Closing Remarks	P. 7
13th Panel Discussion	Special Session of Digital Health	P. 7
Collaborating Events	P. 8

Purpose and background

Japan leads the world as a super aging society, in which one is elderly in three people.

Industry-academia-government have proceeded collaborations as the increase in lifestyle diseases and dementia have become more serious in Japan. It is important for us to be a model of the aging society and to contribute to other countries, by sharing and disseminating our experiences to the world and developing them more with wisdoms from all over the world.

With this background, we, Ministry of Economy, Trade and Industry have held “Well Aging Society Summit Asia-Japan” since 2018 under the cooperation with experts from Japan and the world. We aim to proceed information sharing internationally about healthcare and aging with this summit.

More and more efforts such as healthy diet, participation to the society, and prevention have been done to realize “well aging” which enables us to age healthy physically and mentally. Under this situation, these days, the importance of “well aging” has been recognized again, because it has been reported that people with underlying illness such as lifestyle disease tend to get more serious with infectious disease like COVID-19.

In 3rd Well Aging Society Summit, we will discuss about challenges, trends and solutions, which are changing or becoming apparent, especially, in this COVID-19 situation all over the world. Through this event, we aim to accelerate innovations which contribute to extending health life expectancy throughout the world.

Memo

[illegible]

Healthcare Innovation Hub (InnoHub) is a new one-stop support centre for startups related to the field of healthcare and life-science, which was set up by METI in July 2019.

We will support startups and other entities by utilizing our wide networks. Depending on the needs from startups and other entities, we provide the information on supporters for startups ("InnoHub Advisor"), companies which supports startups in the same field ("Supporting organizations"), and public organizations including ministries, which contributes to business development and expansion.

Website: <https://healthcare-innohub.go.jp/?lang=en>

For inquiry, please contact us at 200010-meti_innohub@ml.jri.co.jp.
